

# Team Contributions: POC Bridging Gaps: AI for Diagram Accessibility

Team 22, Reading4All  
Nawaal Fatima  
Dhruv Sardana  
Fiza Sehar  
Moly Mikhail  
Casey Francine Bulaclac

This document summarizes the contributions of each team member up to the POC Demo. The time period of interest is the time between the beginning of the term and the POC demo.

## 1 Demo Plans

We will be presenting that it is possible to take as input an image and output semi-relevant alternative text. This will be done using any machine learning model. We will also demonstrate that its possible to build a user interface that is tabbable. This will contribute to us being able to build an accessible interface that is compatible with screen readers.

## 8 CICD

For CI and CD, we used Github Actions to automatically trigger a project build and will run unit tests as they are built, whenever a commit occurs or pull requests are opened. This ensures errors are discovered as early as possible and that the project remains in a working state during development.

## 9 Team Charter Trigger Items

This section is not applicable as no items from our Team charter were triggered.

## 10 Additional Productivity Metrics

An additional metric of productivity is how well a team member's work aligns with group's expectations, discussions and is consistent with previous deliverables. This is a metric that was recently discussed and will be used for future deliverables. We plan to utilize the **Revision** label to track work that has been redone by a different team member than originally assigned. We will only consider large revisions to be part of this metric, excluding spelling and grammar corrections.
